

Call for Sponsors

The SwissText Conference 2021 is a three-day joint conference on automatic text analytics, which takes place June 14 - 16, 2021 at FHNW in Brugg. We invite practitioners, analysts, end users, software vendors, researchers and data scientists to join us and share their expertise with the audience.

The SwissText Conference 2021 will bring together practitioners and researchers, providing an overview of existing solutions and technologies, and an opportunity to develop ideas for new and innovative projects using automatic text understanding.

Over the last years, we have had a distinguished line-up of speakers from international IT giants such as Microsoft, IBM and Google, as well as Swiss companies, startups, and universities, and a growing number of participants - typically more than 200!
